

# Tohidealam Nadaf

Full Stack Developer | AI/ML Engineer

tohidealamfnadaf2003@gmail.com | 8007688786 | [Linkedin](#) | [Github](#) | Ichalkaranji, Maharashtra

## Summary

Passionate AI/ML Engineer and Full Stack Developer with hands-on experience in building intelligent systems and scalable web applications. Proficient in Python, TensorFlow, React.js, Node.js, and PostgreSQL. Strong foundation in machine learning, data pipelines, and RESTful API development. Committed to continuous learning and delivering impactful solutions.

## Work Experience

### Data Science and Machine Learning Intern | Techno+Logic Group

Jul 2022 - Aug 2022, Ichalkaranji, India

- Designed and implemented ML models for object motion detection using Python and TensorFlow.
- Performed data preprocessing and applied supervised ML algorithms on real-world datasets.
- Gained practical understanding of the ML development lifecycle and team collaboration.

### Full Stack Developer Intern | Compserv Consultants Pvt Ltd

Aug 2025 - June 2026, Kolhapur, India

- Working on Baramati Nandan Milk Dairy's ERP system, developing and maintaining full-stack modules using Angular, NestJS, and Microsoft SQL Server.
- Troubleshooting bugs, optimizing backend APIs, and improving database performance through efficient query design and schema management.
- Collaborating in an Agile environment to deliver new features, enhance UI/UX of dashboards, and ensure system scalability and reliability.

## Education

### Bachelors in CSE (AIML) | D.Y. Patil Agriculture and Technical University

Aug 2023 - Jun 2026, Talsande, India

Pursuing the Bachelor's Degree in Artificial Intelligence and Machine Learning

### Diploma in Computer Engineering | Sharad Institute of Technology and Polytechnic

Aug 2020 - Jun 2023, Yadra, India

Earned Diploma in Computer Engineering

## Skills

- Languages:** Python, C++, JavaScript, HTML5, CSS3, TypeScript
- Frameworks & Libraries:** Angular.js, React.js, Nest.js, Pandas, NumPy, TensorFlow
- Databases & Version Control:** MySQL, PostgreSQL, Git
- Tools and Platforms:** Power BI, Visual Studio, Jupyter Notebook
- Others:** REST APIs, WebSockets, Problem-Solving, Team Collaboration

## Projects

### EchoClean – Real-Time AI Deepfake Voice Detection System | AI/ML Developer

Jan 2025 - Apr 2025

- Built a real-time deepfake voice detection app with 80%+ accuracy using custom audio embeddings and Flask.
- Developed a full-stack voice analysis tool with live recording, multi-format support, and local processing.
- Designed scalable, secure REST APIs and adaptive fast-mode audio processing.

### Decentralized Voting & Polling Platform with Verifiable Transparency | AI/ML Developer

Aug 2024 - Nov 2024

- Developed full-stack web application using React.js, PostgreSQL.
- Enabled peer skill barter system with dynamic profiles and real-time messaging via WebSockets.
- Focused on modular REST API design, authentication, and frontend responsiveness.
